Date: August 7th, 2025

Time: 19:00–20:00 PM(PCT)

Attendees: Prof.Jabed, Prof.Yue and Feng

Topic: Feng's presentation of the project framework and feedback from Prof. Jabed and Prof. Yue.

Summary of Discussion

- Feng presented the framework of the project, including the basic stream of the data analysis and the way to operate the data sets.
- Prof. Jabed asked several questions about the data sets and the analysis methods, including location information, purposes of clustering analysis and how and why the references and non-reference sites were assigned into different clusters in each of which there were both reference and non-reference sites.
- Prof. Yue asked about the data quality after the merging operations on three data sets, and if the preliminary analysis partially confirmed the ideas, or they were staying in the planning stage.

Decisions Made

- Prof. Jabed suggested Feng to include location information and add some spatial analysis in the project.
- Prof. Jabed suggested Feng to not delay the weekly meetings because it is a good way to keep supervisors informed and confirm the work is meaningful.
- Prof. Jabed advised Feng to think more about the meanings behind each step of the analysis, organize them clearly and explain them well in either writing and speaking, for second verification the meaning of each step.
- Prof. Jabed suggested Feng to always keep Prof. Jan informed about his work, it is more about ecological meanings at the current stage.

Action Items

- Feng will go to explain the meanings behind each step of the analysis with more details.
- Feng will contact Prof. Jan more often and keep him informed about the work, revising the work based on the given feedback when there is any.
- Feng will go to revise and finish the proposal with more detailed explanations about the analysis steps discussed in this meeting.
